

Three phase input 3,000W Programmable CVCC AC-DC Power Supplies

The compact HWS3000GT AC-DC power supplies can deliver 3,000W with a 3-phase input voltage of 170- 265Vac. The nominal output voltages (24V, 48V, 60V or 130V) and output current are fully programmable from zero up to their maximum rating. This can be achieved using a serial RS485 interface (MODBus protocol) or analog 1-5V or 4-20mA signal. Up to three units can be connected in series and / or ten units in parallel. The HWS3000GT is packaged in a compact 270 x 150 x 61mm (10.6 x 5.9 x 2.4") footprint and has conservatively rated electrolytic capacitor temperatures for long field life. The warranty period is five years.
